Summary

What the screenshots show, what it means, and what to do first.

40 / 100

The work already travels (three reels past 4,500 views). The account around it hasn't been re-signed as KJ VISION, and it went quiet.

Top findings

1. **Momentum stalled because posting stopped.** KJ confirms ~1 reel in the last 30 days. That explains the 587 views for the whole month, when each pinned reel alone has 4,539–5,402. The newest captured row has 153 / 198 / 538 views. Post dates are not visible.
2. **Motion wins, stills don't.** All six tiles above 2,300 views are videos. The best still is 293 (a mirrored-facade carousel). Single photos have a median of 78.
3. **Arabic lines and Dubai movement are the strongest pattern.** Reels with Arabic text have a median of 1,708 views (n=6) against 225 for English text (n=4). Dubai motion reels have a median of 1,133 (n=8). Still photography: 81.5 (n=12). The

samples are small, so read these as a direction, not a law.

4. **Nothing on the profile says KJ VISION yet.** The name field reads "ZKJ VERSE", the picture is the master-brand mark, the bio uses ✦ bullets and has no Arabic or CTA, and 2 of the 3 pinned reels are not Dubai.
5. **The link never reaches prints.** The Linktree lists Unknown Presence, NFTs and socials. zkjverse.com is a live shop (a print listed at $140.00 USD) that no link from @zkj.verse reaches.

Three quick wins for today

01

Re-sign the profile (15 min). Apply the profile kit: name field *KJ VISION · Dubai Light*, the bilingual bio, the gold Watching Eyes picture and the five highlight covers. Rename the Linktree to *linktr.ee/kjvision* and put Prints first.

02

Fix the first row (5 min). Unpin the sea and forest reels but keep them posted. Pin the Burj-in-fog (5,135), highway-drive (3,613) and high-window (2,878) reels. Give the two black-cover reels (1,280 and 2,301 views) a real cover frame.

03

Post and prune (30 min). Publish NEW 1, “Seeing, engineered.”, to announce the name. Then start the following cleanup: ≤ 50 a day from “Least interacted with”, target below 600.

الملخص بالعربية

التقييم: 40 من 100. العين قويّة والمحتوى أصلي، والريلز المثبّتة الثلاث وصلت بين ٤٬٥٣٩ و٥٬٤٠٢ مشاهدة، أي أكثر من ثلاثة أضعاف عدد المتابعين. لكن الحساب صامت: ٥٨٧ مشاهدة فقط في آخر ٣٠ يومًا، والسبب أن KJ نشر ريلًا واحدًا تقريبًا خلال الشهر.

ما ينجح: الفيديو المتحرّك في دبي (القيادة، ناطحات السحاب، الإطلالة من النافذة)، وخصوصًا الريلز التي عليها سطر عربي (الوسيط ١٬٧٠٨ مشاهدة). الصور الثابتة وسيطها ٧٨ مشاهدة فقط.

ما يجب إصلاحه: الاسم وصورة الحساب ما زالا «ZKJ VERSE» وليس KJ VISION، والرابط في البايو لا يوصل إلى الطبعات، وعلى الشبكة ستّة أنماط مختلفة للنص.

الخطوات: طبّق حزمة الملف الشخصي (الاسم KJ VISION · Dubai Light، البايو، صورة العينين الذهبية، أغلفة الهايلايت). ثبّت أقوى ثلاث ريلز من دبي. انشر ٣ مرات أسبوعيًا لمدة ٣٠ يومًا: ريلزان لدبي ومنشور عبارة أو عمل معكوس. خفّض المتابَعين إلى أقل من ٦٠٠ بحد أقصى ٥٠ يوميًا.

Score and reasoning

brand-audit rubric (ZKJ SYSTEM). Only what is visible was scored.

Dimension	Score	Bar		Why
Presence	9 / 15		60%	Complete profile (category, 4-line bio, link, 4 highlights, 3 chips) — but the name field reads "ZKJ VERSE" (master brand, no searchable keyword), highlight covers are random photo crops and "∞" / "Peace time" don't say what is inside.
Consistency	3 / 15		20%	KJ confirms ~1 reel in the last 30 days (rubric wants ≥3 a week). At least 6 different text-overlay styles and 5+ colour grades on the grid — no recognisable system yet.
Content quality	12 / 20		60%	100% original footage with a real eye for Dubai structure and light; native Arabic lines. Loses points for weak/absent hooks, two reels with black covers, and a pinned row where 2 of 3 are not Dubai.
Engagement signals	6 / 15		40%	Only views are visible. Pinned reels reached 4,539–5,402 (3.3–4.0× followers) but the non-pinned reel median is 304 and single photos 78. Likes, comments, saves and replies were not visible.
Conversion path	4 / 20		20%	The bio link (linktr.ee/jigikj) lists Unknown Presence, OpenSea, YouTube NFTs, TikTok, X, Threads — nothing for KJ VISION or prints. zkjverse.com has a live shop, but no link from @zkj.verse reaches it. No CTA in the bio.
Reputation	n/a		n/a	No public reviews exist for an artist Instagram account. Excluded and the rest scaled to 100, as the method requires.
Total	**34 / 85**	Scaled to 100 → 40	below 50

Content performance

Views per tile, as shown in the grid on 11 Oct 2026. Medians, not averages, because the three pinned reels skew everything.

By format — median views

Pinned reels n=3	5,135
Other reels n=13	304
Carousels n=7	154
Single photos n=7	78

Reels: 13 with a reel icon + 3 pinned. Photos: 7 of 10 have visible counts. 6 tiles have no visible type icon and are left out.

By theme — median views

Arabic text overlay (reels) n=6	1,708
Black-cover reels n=2	1,790.5
Dubai motion (car / window / skyline) n=8	1,133
Mirrored / edited art n=2	272
English text overlay (reels) n=4	225
Still photography (sky, moon, night, towers) n=12	81.5

Groups overlap (a reel can be both Arabic-text and Dubai motion). Small samples: read as direction, not proof.

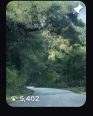

Momentum

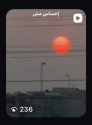

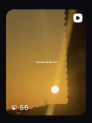

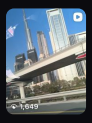

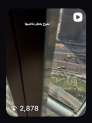

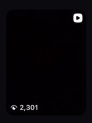

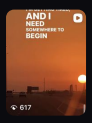

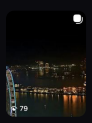

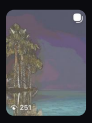

The Professional dashboard shows **587 views in the last 30 days** for the whole account. Each pinned reel alone has 4,539–5,402. KJ confirms he posted **only ~1 reel in the last 30 days**, which explains the drop: the content still works, there just wasn't any new content. The newest captured row (R1) has 153 / 198 / 538 views. Post dates are not visible on the grid, so recency can't be measured more precisely.

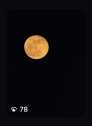

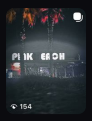

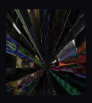

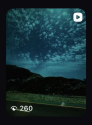

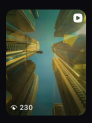

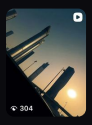

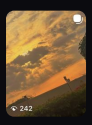

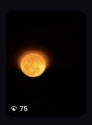

Visual consistency

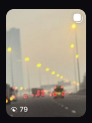

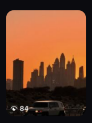

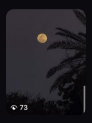

The text overlays use at least six styles: plain white Arabic sans (R2-1, R4-1), Arabic with full diacritics (R1-3), bold mixed-size Arabic (R2-3, R3-1), heavy condensed English caps (R4-3), a tiny serif (R3-2) and typewriter mono (R10-3), plus a heavy sans with an emoji (R1-2). The colour grades also vary: teal/cyan (R9-1, R9-3), warm orange (R4-3, R12-2), vintage/faded (R7-3), posterised (R5-3), saturated HDR (R7-1, R12-1) and edge-glow line art (R5-1). The subjects hang together (Dubai towers, roads, light); the styling doesn't.

Type from the grid icon: ▶ reel, stacked squares carousel, no icon single photo. ∗Pinned: the pin covers the icon, so these are typed as reels per KJ. Row ids: P = pinned, R1 = newest. Screenshots overlapped and duplicates were removed (03 = rows R1–R4, 02 = R3–R7, 04 = R8–R12).

What's working

Backed by the view counts above.

- **Video carries the account.** The six highest tiles are all videos: 5,402 · 5,135 · 4,539 · 3,613 · 2,878 · 2,301. No still passes 293.
- **Reach beyond followers.** The pinned reels got 3.3–4.0× the follower count (1,358) in views, so the algorithm does push this footage.
- **Arabic lines over Dubai movement.** The Arabic-text reels have a median of 1,708 (n=6). The highway drive with an Arabic line (3,613) and the high-window view with an Arabic line (2,878) are the best non-pinned tiles.
- **Mirrored architecture is the best still format.** The mirrored facade got 293 and the posterised palms 251, against 81.5 for plain still photography. That is the base for KJ VISION's "mirror" series.
- **Everything is original.** No stock. The images are dark-first, which already fits an Obsidian canvas.

What to fix

Priority · evidence · action · the ZKJ SYSTEM skill that does it.

NOW — content-studio · effort M

Posting stopped — restart at 3 a week

Why The account earned 587 views in the last 30 days; KJ confirms only ~1 reel was posted in that window. Each pinned reel alone has 4,539–5,402 views, so reach is there when content is.

Do Post 3× a week for 4 weeks: 2 Dubai motion reels + 1 editorial statement or mirror-art post. Batch-film one evening drive per week.

NOW — brand-kit · effort S

Profile still says ZKJ VERSE

Why Name field "ZKJ VERSE", master-brand profile picture, ✦ bullets, no Arabic, no CTA.

Do Apply the profile kit already prepared: name, bio, Watching Eyes picture, highlight covers.

NOW — whatsapp-assistant · effort S

Bio link never reaches prints

Why linktr.ee/jigikj (seen 11 Oct 2026) lists Unknown Presence IG/Threads/TikTok, OpenSea, YouTube NFTs, X — nothing for KJ VISION. zkjverse.com is a live shop but is not linked.

Do Rename to linktr.ee/kjvision with the five links in the kit; Prints first (WhatsApp enquiry until kjvision.zkjverse.com is live).

NOW — content-studio · effort S

First impression is not Dubai

Why Two of the three pinned reels are a sea view and a forest road (location not visible).

Do Keep them posted, but unpin them. Pin the Burj-in-fog (5,135), highway-drive (3,613) and high-window (2,878) reels.

NEXT content-studio · effort S

Two reels have black covers

Why R2-2 (1,280 views) and R4-2 (2,301) show a black tile in the grid, so people scrolling the profile can't see what they are.

Do Edit cover → pick a real frame → add a Cinzel label ("KJ VISION · DUBAI AFTER DARK").

NEXT content-studio · effort M

Six text styles, five grades

Why The overlays seen are Arabic white sans, Arabic with diacritics, heavy condensed caps, a tiny serif, typewriter mono and heavy sans with an emoji. The grades are teal, warm orange, vintage, posterised, HDR-saturated and edge-glow.

Do Use one reel text style: Inter 600 for the English line with IBM Plex Sans Arabic 600 in gold below it, 44–52 px, inside the safe zone. Use one grade: deep blacks, warm highlights, no heavy HDR.

NEXT — · effort S

You follow more accounts than follow you

Why Following is 1,716 and followers 1,358, a ratio of 0.79. That reads as follow-for-follow.

Do Unfollow ≤ 50 a day from Following → "Least interacted with", by hand, with no apps. Target: below 600.

LATER brand-kit · effort M

Store sub-domain not live

Why kjvision.zkjverse.com did not resolve (DNS) on 11 Oct 2026.

Do When it goes live, point the Prints link at it and add the "Shop" highlight (cover already made).

LATER content-studio · effort S

Captions not signed or measured

Why Captions and insights (saves, shares, profile visits, link taps) are not visible in the screenshots.

Do Use the caption pattern: observation, then method, then "— KJ", then one CTA. Review Insights weekly against the 587-views baseline.

New profile copy

Ready to paste. It matches the profile kit KJ already has, so nothing here contradicts it.

Link plan

1. **Now:** rename the Linktree `jigikj → kjvision`, then update the IG link the same minute. Use an Obsidian theme with gold outline buttons.
2. Links, in order: ◆ **Prints & limited editions** (WhatsApp enquiry until the store is live) · **ZKJ SYSTEM** (AI tools) · **Unknown Presence** (IG) · **YouTube** · **Email KJ**. Delete the rest.
3. **When kjvision.zkjverse.com resolves** (it did not on 11 Oct 2026), point Prints straight at the store and add the Shop highlight.
4. **For KJ to decide:** zkjverse.com is already a live shop. "Shop now" goes to /collections/all, a print is listed at $140.00 USD, and its Instagram link points to @unknown.presence.kj. Until the KJ VISION store exists, the Prints button could go to zkjverse.com/collections/all instead of WhatsApp. Adding @zkj.verse to the site footer would close the loop.

Following clean-up

1,716 following against 1,358 followers. Go to Following → **"Least interacted with"** and unfollow inactive or unrelated accounts, **≤ 50 a day**, by hand. Target: **below 600** in 3–4 weeks. Stop follow-for-follow.

Open space

- None of the sources found pair **Dubai architecture motion** with **Arabic poetic lines** and an **engineer's signature**. Those are KJ's three best-performing traits together.
- Selling numbered editions through a Dubai platform is a working model in the region (Gulf Photo Plus, Dhs 495 editions). KJ already has editions of 10 on zkjverse.com.
- Not scored: competitor accounts couldn't be read, so no fair score is possible.

WEEK 2 · RHYTHM

- [ ] Post NEW 4 mirror carousel · NEW 5 “Look closer.” · NEW 6 Dubai after dark
- [ ] Make a reel template: one EN line in Inter 600 + one gold Arabic line in Plex 600, safe zone respected
- [ ] One grade preset for all footage: deep blacks, warm highlights, no HDR
- [ ] Stories 3–4× a week: behind the frame, polls, reshare the new posts

WEEK 3 · SERIES

- [ ] 3 posts: 2 Dubai motion reels (Arabic line first) + 1 mirror-series post
- [ ] Caption pattern on every post: observation → method → “— KJ” → one CTA
- [ ] Reply to every comment within 24 h
- [ ] Add story clips to the Dubai / Light / Art highlights

WEEK 4 · MEASURE & SELL

- [ ] 3 posts, including one prints post (an edition of 10, real price only)
- [ ] Insights review: views by format, profile visits, link taps, follows. Compare with the 587 baseline
- [ ] Following below ~600?
- [ ] If kjvision.zkjverse.com is live: swap the Prints link, add the Shop highlight
- [ ] Re-run this audit with fresh screenshots

What could not be verified

- Instagram is blocked from this network. Every account figure comes from KJ’s screenshots, not a live read.
- Post dates are not visible, so posting frequency comes from KJ’s own statement (~1 reel in 30 days), not from the grid.
- Likes, comments, saves, shares, reach split and audience data are not visible. Only views are.
- Six tiles: views not visible (R7 row). Six tiles: type icon not visible (R1, R8). Three tiles: not captured (one grid row). R8 subjects: only the bottom strip is visible.
- The pinned tiles are typed as reels from KJ’s description; the pin icon covers the type icon.
- The targets of the profile chips "jamal Dubai" and "KJ ART" were not identifiable from the screenshot. The "and 4 more" bio links were not visible.
- No competitor Instagram follower counts could be verified (Instagram pages are not readable here); all are "Not found" except the published @arabic.pop.art figure.
- Whether system.zkjverse.com and the WhatsApp link in the kit work was not tested.

"Not found" / «غير متوفر» means we couldn't find the figure. It is never an estimate. This is a private document for KJ, not for publication.
